M220911738

Dear Sir/Madam,

We have processed your call M220911738 about permission of using "Italian town atlases by Blaeu".

Dear Stefano,

Yes, this publication is in public domain. So , you can (re)use the image. Permission granted !
If it is for online use, I am sure that the quality you find with us, is high enough.

with kind regards,

Frans Sellies

Good morning, I need some information.

I am part of the user and developer community of QGIS, an open source desktop GIS software [1].

Every year the annual developers' meeting is held in a different city, and the next version of QGIS has as its initial splash page a map of the city that hosted the meeting.

This year the meeting was held in Florence at the end of August and, as the Italian community, we are preparing the splash page of the 3.28 QGIS version which will be called Firenze.

I found this map in your catalog [2] but I don't understand if this image is in public domain and if we can use it.

Could you please tell me if the image can be used?

thank you very much for your help

Stefano Campus

ps: Here you can find the history of all QGIS splash pages [3].
